CAREER SUMMARY

Passionate MERN Stack web Developer with experience building dynamic websites. Proven skills in full-stack development, from responsive UI design (React) to secure API creation (Node.js/Express.js) and database integration (MongoDB, Firebase). Seeking a challenging internship or job to leverage my technical foundation, contribute innovative solutions, and grow in a fast-paced development environment.

WORK EXPERIENCE

Web Development Intern | Software Synergy Solutions
July 2024 – December 2024

- Collaborated with the development team throughout the full software development lifecycle of web applications.

- Tested and debugged front-end and back-end applications to ensure optimal performance and responsiveness.

- Provided ideas and constructive feedback to improve web development processes and code quality.
